

# VIDEO ASSEMBLIES — RG-59 & Mini Analog BNC & RCA

## CCTV Molded RG-59 BNC & RCA Video Cables

1

These BNC to BNC, BNC to RCA, and RCA to RCA video jumper cables are the finest molded assemblies in the industry! Designed specifically for analog video and CCTV applications, they are made with a high quality RG-59 coax cable (0.242" OD) featuring a bare copper center conductor with more than twice the stranding of standard RG-59 coax. This high stranding allows for maximum flexibility and flex-life, and also ensures maximum video signal transmission. In addition, the cable features 95% shielding to isolate the video signal from outside interference. Finally, the cables feature professional molded 75Ω BNC connectors and/or professional RCA connectors with integrated strain relief for durability and high flex-life.

### Features

- The best molded video assemblies in the industry!
- Low cost, yet high quality professional assemblies
- Manufactured with 75Ω high-strand RG-59 coax cable (0.242" OD)
- 95%+ shielding provides excellent noise resistance
- Manufactured with molded 75Ω BNC connectors or professional molded RCA connectors
- Gold-plated center pin for signal integrity & corrosion resistance
- Ideal for professional analog video & CCTV applications

## CCTV Molded "Miniature" BNC & RCA Video Cables

The finest "miniature" analog video cable assemblies in the industry! These unique, molded professional BNC to BNC, BNC to RCA, and RCA to RCA jumper cables are designed for high density environments or applications where high flexibility or tight bend radius is important. They utilize a very flexible cable with a stranded center conductor, 93% shielding, and 75Ω BNC connectors. Excellent for all professional analog video and CCTV applications.

### Features

- The best molded miniature video cables in the industry!
- Low cost, yet high quality professional assemblies
- Manufactured with miniature (0.157" OD) 75Ω high-strand coax
- 93%+ shielding provides excellent noise resistance
- Manufactured with molded 75Ω BNC connectors or professional molded RCA connectors
- Gold-plated center pin for signal integrity & corrosion resistance
- Ideal for professional analog video & CCTV applications
